Land use zoning map based on the ortho-rectified satellite image produced through the fusion of World View 2 m MS and Panchromatic 0.5 meter spatial resolution acquired on 2021 and some data was digitized from Google Earth Pro and SAS PLANET very High Resolution Google earth imageries. Basically the zoning was based on land use map and report from National Land Use Project subjective analysis of present land use. Present land use was also considered while defining the boundary of land zoning. Extensive field study, Public Auditing, was carried prior to delineating to have better understanding of the social setting of the study area.
